

# Building Bridges, Building Relationships<sup>SM</sup>

**Build on a solid foundation – work with a proven bridge partner that has decades of experience and the latest in design and construction know-how.**

Tap into the vast expertise of Vecellio & Grogan, Inc., a Top 30 highway and bridge contractor founded in 1938. Our reputation as an expert in bridge constructability spans multiple generations.

We build even complex bridges and structures on time and within budget. We can also contribute extensively on design and construction planning to shorten the project schedule and reduce project costs.

**You will be fully confident working with Vecellio & Grogan. “We don’t just build bridges, we build relationships.” We want to be...**

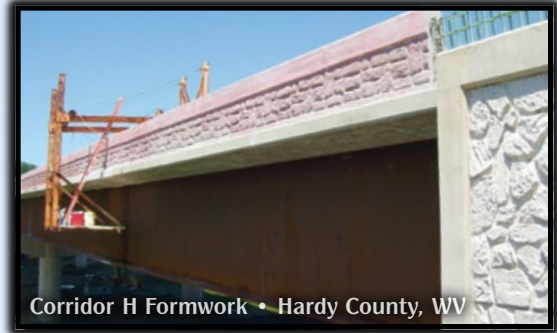

***...Your Bridge Partner for Successful Results!***

**VECELLIO  
& GROGAN, INC.**

# Design-Build Projects

As your design-build partner, Vecellio & Grogan will work closely with you to develop and implement the most cost-effective bridge design and construction plan for a successful and profitable outcome.

You will benefit from the added value of our extensive experience in engineering, surveying, estimating and construction. We find solutions to the challenges of building high-quality steel and concrete girder bridges to span roadways, railroads, waterways, wetlands or farmlands.

Whether working in the unyielding rock of the mountains or sandy soil by the shore, we are able to plan and produce the most successful outcome for the location.

**Our experience is second to none.** We've built bridges longer than 2,000 ft. and over 130-ft. wide, out-to-out. We've constructed 200-ft.-plus piers rising from barely-accessible gorges and installed temporary work platforms to protect sensitive wetlands.

We've built huge Interstate interchanges with lengthy flyovers and split bridges, including one project with 13 individual bridges. On another job we had exactly 7 days and nights to lift, splice and place 45 steel girders in 15 lines spanning 286 ft. between abutments – and we made it with time to spare.

In addition to this vast and varied experience, you will benefit from our extensive bonding capacity and one of the industry's most impressive safety records.

I-440/US-64 Interchange • Raleigh, NC

**Difficult Specifications or Locations,  
Fast-Track Schedules, Safety Emphasis**

East Beckley Bypass • Beckley, WV

**With Vecellio & Grogan as your bridge/structures subcontractor, you will gain a partner who understands all aspects of heavy/highway construction and can plan and build in the most effective manner.**

We understand the big picture and will make sure the structure work progresses properly within the job parameters and schedule. We can scale up operations to take on virtually any size project, and our supervisors and crews bring a wealth of real-world experience.

You will appreciate our many decades of experience creating innovative and cost-effective solutions.

Our team will work closely with you to keep your projects on or ahead of schedule to ensure successful results.

**We're licensed or prequalified in 12 states throughout the mid-Atlantic and beyond.** We're experienced in handling all types of project conditions:

- Challenging or unusual bridge dimensions or configurations
- Extremely difficult terrain
- Environmentally sensitive or hard-to-access locations
- Near-impossible schedules

If there's a way to perform the work more efficiently, we'll find it, trimming time off the schedule, costs from the budget, or both, enhancing the project for the entire team through Value Engineering where applicable.
