 - Vecellio Group, Inc.

The Vecellio Group is a well-respected, privately held family of contracting firms consistently ranked among the nation's top 200 contractors and among the leaders in heavy/highway construction.

With an equipment fleet worth hundreds of millions of dollars and a virtually unlimited bonding capacity, the Vecellio Group provides both the public and private sectors with a wide range of contracting services, performed on time and within budget.

Our multi-faceted operations include:

- **Heavy/Highway Construction**, including excavation, grading, bridges and drainage
- **Complete Site Development** for commercial, industrial and residential projects
- **Asphalt & Paving Contracting**
- **Coal Mine Site Development**
- **Environmental Reclamation**
- **Commercial Aggregate Production**
- **Petroleum Logistics & Services**
- **Turn-Key Golf Course Construction and Remodeling**

The Vecellio Group is American owned and operated. Since 1938 we have provided our valued customers with "Excellence In Contracting," producing consistent, high-quality, cost-effective results. We look forward to providing the same high level of customer service on your next project.

The Vecellio Group is privately owned by Leo A. Vecellio, Jr., his wife, Kathryn Vecellio and their sons, Michael (left) and Christopher.

Chairman, President and CEO of the Vecellio Group, Leo A. Vecellio, Jr., shown with his father, company founder Leo A. Vecellio, Sr. (1915-1996).

Quality You Can Count On Down The RoadSM

Above: Commercial site development project in West Virginia.

Left: Computerized GPS grading system in use on SR-288 job in Richmond, Virginia.

Below: New runway construction at Piedmont Triad International Airport in Greensboro, North Carolina.

Vecellio & Grogan is one of the nation's leading heavy/highway contractors, known for prosecuting even the toughest of jobs throughout the Mid-Atlantic states and beyond. Since 1938, we have operated from our Beckley, WV, headquarters with a steadfast commitment to providing high quality, cost-effective results.

We take pride in our work and it shows, from highways, bridges and runways, to award-winning asphalt pavements, to site development projects for our private-sector customers. You can count on Vecellio & Grogan — and on Sharpe Bros., our grading, paving and utilities division based in Greensboro, NC.

Right: Award-winning US-23 project in Norton, Virginia.

Below: Coal-mine "face-up" job in West Virginia.

A TRADITION OF EXCELLENCE

Above: Complex US-19 highway construction project on Powell Mountain in West Virginia.
Right: Coal-mine development in West Virginia.

Above: Crew members verify proper torque of bridge bolts on a SR-288 project in Richmond, Virginia.

With our highly experienced personnel and well-maintained equipment fleet, we can assure the timely completion of your project at a very competitive price!

Starting with a small street project in Beckley, West Virginia, nearly three-quarters of a century ago, Vecellio & Grogan, Inc. has grown to become one of the nation's leading heavy/highway construction firms.

Our wide-ranging expertise includes vast earthmoving projects and the superior construction of bridges, retaining walls and other concrete structures. We also provide a complete range of site development services and asphalt contracting.

We're experienced. We're competitive. We're Vecellio & Grogan.

Left: "Corridor H" project in Hardy County, West Virginia. With one of the largest heavy/highway equipment fleets in the industry, V&G crews are ready to tackle any size project, day or night.

Left: Phase One of the nation's first "Smart Road," located in Blacksburg, Virginia.

Below: Another V&G specialty is the construction of bridges and drainage structures, such as these twin, high-volume drainage pipes on a highway project in West Virginia.

At Your Service

Our reputation for excellence was built by providing high-quality, cost-effective contracting services to the public and private sectors.

For generations, the foundation of our success has been striving for complete customer satisfaction in every aspect of our work.

We invite you to experience this high level of customer service, starting with a prompt review and competitive bid on your next project!

Above: We have decades of experience in every phase of site development, including mass excavation, grading and utilities work, for projects ranging from interstate highways and local road construction to commercial, industrial, residential and sporting complexes.

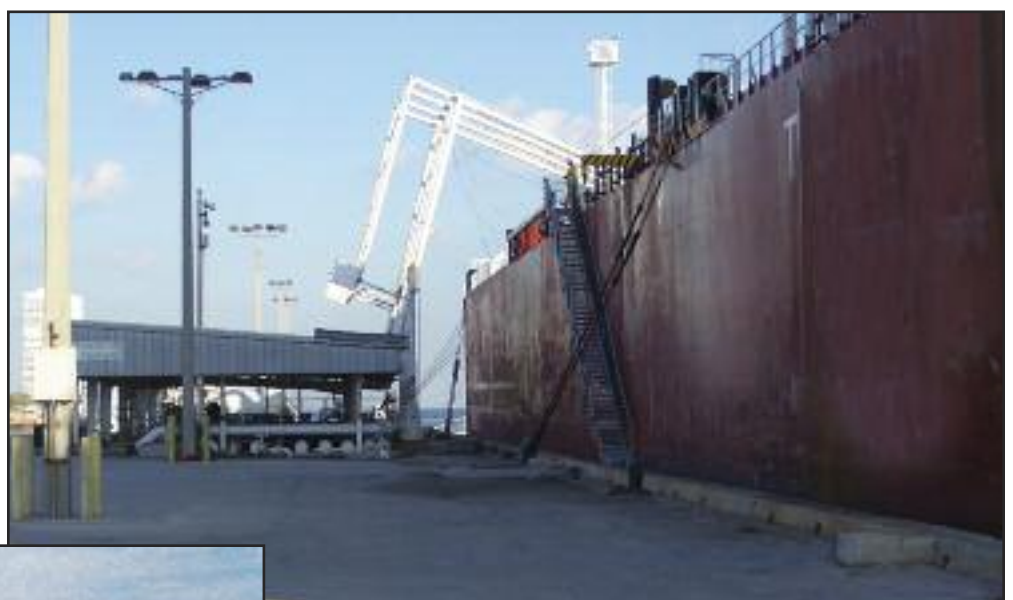

Below right: We own and operate asphalt paving operations in numerous locations in the Mid-Atlantic and Southeastern U.S.

As a member of the Vecellio Group, our foundation for success dates back to 1900, when young Enrico Vecellio began contracting in southern West Virginia. He entered the emerging road-building industry and built several thriving businesses, establishing a reputation for quality and integrity that has endured for generations.

Enrico's son, Leo Vecellio, grew up in the family business. After returning from college and the Army, Leo also became a licensed contractor. In 1938 Enrico, Leo, and his brother-in-law Gene Grogan founded Vecellio & Grogan, the flagship company of the Vecellio Group, providing heavy/highway construction in the mid-Atlantic states and beyond.

Third-generation contractor Leo A. Vecellio, Jr., joined the family business in the 1970s and expanded into the southeastern U.S. and beyond.

Today, the Group includes Vecellio & Grogan; North Carolina-based Sharpe Bros.; and three Florida-based operations: Ranger Construction, a roadway, site work and asphalt paving contractor; Vecenergy, the group's petroleum division; and White Rock Quarries, a commercial aggregates producer.

Above: Our petroleum logistics division includes bulk fuel offloading at Port Everglades in South Florida.

Left: We're known for prompt customer service, such as this high-capacity loader filling trucks with base rock at our Florida quarry.

TRANSPORTATION INFRASTRUCTURE

Above: We are committed to environmentally responsible construction, such as the use of impermeable silt barriers on this riprap project alongside the SR-518 causeway in Melbourne, Florida.

Left: SR-806 milling and resurfacing job in Delray Beach, Florida.

Left: Crew members expertly lay down asphalt on a milling and resurfacing project at Key West International Airport.

We take pride in building the transportation infrastructure that makes travel possible. Before cars and trucks can roll by, before airplanes can whisk passengers away, the equipment and personnel of the heavy/highway construction industry are there.

As one of the nation's leading heavy/highway contractors, we consistently distinguish ourselves through top-quality workmanship and cost-effective solutions to the complex logistics that are an everyday part of the job.

For generations, we have applied this expertise to build roads, bridges, airport runways, highways, residential streets and parking areas throughout the mid-Atlantic and southeastern United States.

Left: Nearing completion on a "Corridor H" highway project in Elkins, West Virginia.

Below: Installation of drainage pipe on a road construction project in Vero Beach, Florida.

Above: SR-60 bypass in downtown Bartow, Florida.

Above right: Airport paving project at Palm Beach International Airport in South Florida.

Right: Highway construction project in Wilkesboro County, North Carolina.

Far right: U.S.1 paving and bridge project in Daytona Beach, Florida.

Right: Massive equipment spread performing excavation and bridge work on a "Corridor H" highway project in Hardy County, West Virginia. With our highly experienced personnel and one of the largest equipment fleets in the industry, we are able to complete even large projects on or ahead of schedule.

INDUSTRIAL & COMMERCIAL

Get the job finished on time and within budget. That's our philosophy — and it has become the hallmark of satisfaction for our many commercial and industrial customers.

With our well-maintained equipment fleet and professional expertise, we can handle any size site development or paving project, from shopping centers to medical complexes, office plazas to municipal facilities.

Whatever your project, you can count on us to provide consistent, high-quality results at a very cost-effective rate.

Below right: Paving a shopping center parking lot in West Palm Beach, Florida.

Bottom right: Site development and paving project for a large retail outlet in DeBary, Florida.

Below: Site development and paving project for a medical complex in Bartow, Florida.

RESIDENTIAL & RECREATION

Above: Retention pond excavation for a large-scale residential site development job near Royal Palm Beach, Florida.

Left: Complete site development work, including numerous lakes, at Baywinds residential community in West Palm Beach, Florida.

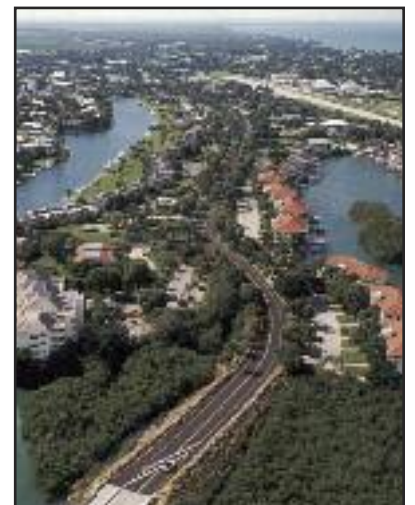

Numerous award-winning communities have been constructed on the solid foundation of our top-quality site development services. We perform highly skilled excavation, grading and utility work for residential and recreational construction, from large-tract housing developments to sports and entertainment venues. We also specialize in asphalt contracting and paving services, including expert milling and resurfacing of residential streets and parking areas. High-quality workmanship combined with fast, efficient service — those are our trademarks, backed by decades of proven experience!

Above left: Residential street resurfacing in Wellington, Florida.

Left: Complete resurfacing project at 8,000-unit King's Point condominium complex in Delray Beach, Florida.

Below: Street resurfacing project at Ocean Reef in the Florida Keys.

Above: Site work performed for major concert venue at the South Florida Fairgrounds.

Right: Sabal Chase apartment complex, a complete site development and paving project in Fort Pierce, Florida.

We also provide a full range of recreational construction capabilities to complement our residential site development services.

From excavation and grading for sloped outdoor amphitheaters, to site work and precision grading for sports fields, we bring to life the creative architectural visions of recreational planners.

A great example of this expertise is our golf course construction and renovations services, which we have performed throughout the U.S. for customers that include the PGA Tour and the developers of dozens of world-class golfing communities. We have worked with the foremost names in golf course design to provide consistent, superior results throughout every phase of the process.

Below: Cross Creek Golf Course, a beautiful 19-hole course built in Temecula, California.

MINING & RECLAMATION

White Rock Quarries is one of Florida's leading limestone producers and one of the nation's top-producing quarries.

Located in northwest Miami-Dade County, White Rock was built from the ground up with high-volume production in mind, from mining, crushing and processing, to loading and ticketing customers' trucks. Quality control is assured through extensive daily laboratory testing and continuous monitoring of all production operations.

Left: White Rock's phase IV addition to the plant, which came online in 2004, doubled production capacity.

Below: Aerial view of White Rock Quarries' high-capacity processing plant in Miami, Florida. Limestone is a vital component of the construction industry, used to make ready-mix concrete, concrete blocks and pipes, roof tiles, paver bricks, road base, asphalt paving mixes and other products.

Right: White Rock's massive, 105-c.y. capacity Marion 8200 walking dragline, operated under an agreement with North American Mining.

The Vecellio Group plays a vital role in environmental reclamation, as well as restoring mined properties to their original, and in many cases, even improved condition.

Additionally, we reclaim and recycle several hundred thousand tons of pavement materials each year at our asphalt plants, helping to preserve our country's resources. This is illustrated in the photos at left: 1) Prior to resurfacing, roadways are often milled to avoid excessive buildup. 2) Millings are brought to our portable recycling plant. 3) Milled asphalt and recovered concrete materials are gathered for crushing. 4) Materials are loaded into the portable crushing plant. 5) Recycled aggregate emerges ready for re-use in D.O.T.-approved asphalt mixes.
