Site Work Subcontract

Ladies and or Gentlemen:

Vecellio & Grogan, Inc (Subcontractor) recently completed a very difficult Site work effort for Shaw Constructors, Inc (Company) at the subject jobsite. This work required close coordinated efforts on the part of the Company and the Subcontractor for the construction of the VCHEC 600MG Coal Fired facility.

The Subcontractor worked under very difficult conditions in an area of heavy mine spoil and soil removal of a compact footprint for facility construction. The Subcontractor performed its work without fail and with few subcontract change orders under extreme design conditions.

It was a pleasure working with the Subcontractors Staff and the coordinated effort put forth by all under extreme site conditions.

Should you need further verification of Vecellio & Grogan, Inc capabilities, please do not hesitate to contact me @ 704.331.6006 or email: Kenneth.reames@shawgrp.com.
